

We feel privileged to be a part of Bangla Interventional Therapeutics (BIT). This is indeed a great opportunity of all interventional cardiologists to interact, exchange views and improve the skill. With the sharing of the light of knowledge to enkindle the cardiologists, healthcare professionals, medical executives from all over the world who are actively involved in cardiac intervention, research and therapeutics development will congregate annually scheduled to be held in February every year. The meetings will provide participants a face-to-face platform to learn and share update breakthroughs and promising solutions to interventional cardiology and development a common protocol.

Apart from the annual summit for cardiologists, our activities include arranging workshops/symposia for doctors, Cath Lab technicians and nurses.

This dynamic website has a unique opportunity for submission of interesting cases and exchange of views. The cases will be reviewed by the experts around the world.

We welcome your active support and participation in the BIT website and in the events.
